

JOSHUA IGHO

PROFESSIONAL SUMMARY

A Full-Stack Software Engineer with experience designing and building modern web applications, scalable backend systems, and secure authentication platforms. Skilled in React, Node.js, Express.js, TypeScript, and PostgreSQL, with a passion for creating developer-focused tools and delivering responsive, high-performance digital experiences.

WORK HISTORY

Full-Stack Software Engineer, 01/2026 to Current

7 months

FortifyAuth

- Built secure REST APIs for authentication, authorization, and user management, enhancing security through JWT-based authentication.
- Designed and developed developer-first authentication platform with Node.js, Express.js, TypeScript, and PostgreSQL to streamline user access management.
- Applied backend security best practices including password hashing, request validation, and role-based access control.
- Developed interactive API documentation and API playground to facilitate seamless developer integration and usage.

Frontend Developer, 01/2026 to 02/2026

2 months

Ijityi Signature

- Developed responsive React interfaces, enhancing user engagement on premium business website.
- Built reusable UI components and implemented responsive layouts to streamline development process.
- Optimized frontend performance, boosting user experience across devices.

Frontend Developer, 02/2025 to 03/2025

2 months

Africa Caribbean Connect

- Developed responsive frontend interfaces with React and Tailwind CSS to enhance user experience.
- Created reusable components and interactive sections to streamline development process.
- Collaborated on launch of production-ready organisational website to improve online presence.

Full-Stack Engineer, 01/2023 to 01/2024

1 year and 1 month

Charmé

- Engineered full-stack e-commerce platform to enhance user experience and streamline purchasing.
- Created secure authentication, product management, shopping cart, and checkout functionalities to improve transaction security and user engagement.
- Developed RESTful APIs using Node.js and Express.js with PostgreSQL.
- Optimised application architecture and database performance to support scalability and reduce loading times.

EDUCATION

B.Sc., Computer Science

Oduduwa University - Ipetumodu (OUI)

CERTIFICATIONS AND LICENCES

Responsive Web Design Certification *Provider: freeCodeCamp Year: 2025*

A2 English for Developers *Provider: freeCodeCamp Year: 2025*

Legacy JavaScript Algorithms and Data Structures V8 *Provider: freeCodeCamp Year: 2025*

Legacy JavaScript Algorithms and Data Structures V8 *Provider: freeCodeCamp Year: 2025*

WEBSITES, PORTFOLIOS, PROFILES

- <https://github.com/joshuaigho>
- <https://joshuaigho.netlify.app>
- <https://www.linkedin.com/in/joshtechhbuild>

SKILLS

- Frontend development: React, TypeScript, HTML5, CSS3, Tailwind CSS
- Backend development
- Artificial intelligence fundamentals
- API development
- Database management: PostgreSQL, Prisma ORM
- Development tools: Git, Swagger/OpenAPI, Postman, Vite

AWARDS, ACCOMPLISHMENTS, AND HONOURS

- Built and deployed **FortifyAuth**, a secure authentication platform with REST APIs, JWT authentication, and interactive API documentation.
- Developed multiple full-stack web applications using React, Node.js, Express.js, PostgreSQL, and TypeScript.
- Delivered responsive frontend solutions for client projects, focusing on usability, performance, and maintainable code.
- Designed and implemented secure authentication, database-driven features, and RESTful APIs across personal and client projects.
