SUMMARY

A Full-Stack Software Engineer with experience designing and building modern web applications, scalable backend systems, and secure authentication platforms. Skilled in React, Node.js, Express.js, TypeScript, and PostgreSQL, with a passion for creating developer-focused tools and delivering responsive, high-performance digital experiences.

EXPERIENCE

Full-Stack Software Engineer

FortifyAuth

Jan 2026 – Present

- Designed and developed a developer-first authentication platform using Node.js, Express.js, TypeScript, and PostgreSQL.
- Built secure REST APIs for authentication, authorization, user management, and JWT-based authentication.
- Developed interactive API documentation and an API playground to improve the developer integration experience.
- Applied backend security best practices including password hashing, request validation, and role-based access control.

Frontend Developer

Ijituyi Signature

Jan 2026 – Feb 2026

- Developed responsive React interfaces for a premium business website.
- Built reusable UI components and implemented responsive layouts.

- Optimized frontend performance and improved user experience across devices.

Frontend Developer

Africa Caribbean Connect

Feb 2025 – Mar 2025

- Built responsive frontend interfaces using React and Tailwind CSS.
- Implemented reusable components and interactive content sections.
- Collaborated on delivering a production-ready organizational website.

Full-Stack Engineer

Charmé

2023 – 2024

- Designed and developed a full-stack e-commerce platform.
- Built secure authentication, product management, shopping cart, and checkout functionality.
- Developed RESTful APIs using Node.js and Express.js with PostgreSQL.
- Optimized application architecture and database performance.

EDUCATION

B.Sc. Computer Science

Oduduwa University, Ipetumodu (OUI)
